

# INCIDENT MANAGER

This helpful tool forms part of our Supply Chain Management module and allows you to keep up to date with recent RASSF food alerts so you can stay ahead of the curve on any upcoming issues.

## FEATURES INCLUDE:

- ✓ Linked to RASSF system for food alerts, allowing you to set up notifications highlighting any products that have potential issues regarding ingredient specifications.
  - Search for notifications relevant to you using the filters.
  - ✓ View details of individual RASFF notifications with the ability to export these details to PDF and create incidents based on them.
  - ✓ Configure email alerts filtered by product category, hazard category and countries concerned, so you are immediately informed about any RASFF notifications of importance to you.
- Our Supply Chain Management module with each of its tools interconnects and integrates seamlessly with our Quality Management and Trading and Planning modules and are available on the Foods Connected single pane of glass platform.
